# Akintunji Sule

(469) 657-1990 | akintunji.sule@gmail.com | https://linkedin.com/in/akinsule | https://github.com/AkinSu | https://akintunjisule.com

## EDUCATION

**University of Texas at Dallas** — Richardson, TX
*Bachelor of Science in Computer Science,* GPA: 3.48 — Expected May 2026
**Relevant Coursework:** Machine Learning, Artificial Intelligence, Computer Vision, Automata Theory, Database Systems

## TECHNICAL SKILLS

**Languages:** Python, GO, Java, JavaScript/TypeScript, SQL, C#, HTML/CSS
**Machine Learning:** PyTorch, TensorFlow, Scikit-Learn, YOLO, OpenCV, Prompt Engineering (RAG, CoT, ReAct), Agentic AI Systems
**Web & Backend:** React, Vue, Nuxt, Node.js, Express, Flask, Django, PostgreSQL, MongoDB
**DevOps & Tools:** AWS, Azure Functions, Terraform, Docker, Git, pgvector

## WORK EXPERIENCE

**Luminator Technology Group** — Plano, TX
Software Engineer Intern — June 2025 – Present

- Built bus shelter monitoring system with Azure Functions and Go that captures images from bus cameras and triggers cleaning alerts based on vision model evaluations
- Developed video severity scoring pipeline to detect high-impact events (fights, weapons) and route frame-level alerts to customers in real-time
- Designed RAG pipeline with LLM-assisted reasoning for natural-language queries over video content, added SQLite caching to eliminate redundant GPT-4o calls on repeated queries
- Built two Dockerized microservices (ArcFace, CLIP) backed by PostgreSQL and pgvector for biometric matching and semantic search over video frames
- Deployed YOLOv8 and integrated DeepFace + DeepSort for person tracking across low-quality footage
- Managed infrastructure with Terraform and documented failure modes, architectural diagrams, and tradeoffs for stakeholders

**iCode School** — Richardson, TX
Campus Technical Instructor — Jan 2023 – Dec 2025

- Designed curriculum and lecture materials in Python and Java for K–12 students across multiple proficiency levels
- Mentored 20+ students through complex conceptualization of data science projects, focusing on code logic and algorithmic thinking

## PROJECTS

**Texas Government Information Forum** (Scikit-Learn, Numpy, Regex, Pandas, matplotlib)

- Built a predictive NLP pipeline to classify Texas Legislature bill passages using text features and legislative metadata
- Trained an LSTM network achieving 78% precision on held-out data; addressed class imbalance via random undersampling and applied quantization to reduce inference latency

**Lovify.me** (PyTorch, AWS, Lambda, Flask, HTML/CSS, MongoDB, SQL)

- Trained a Decision Tree classifier to predict users' zodiac-sign "music personality" from audio features
- Designed a K-Nearest Neighbors recommendation model using audio feature extraction from Spotify Web API to generate personalized track suggestions
- Deployed a serverless Flask backend on AWS Lambda with a responsive frontend for real-time playlist interaction

## LEADERSHIP AND PROFESSIONAL DEVELOPMENT

**UT-Dallas African Student Union | Kazala** — Richardson, TX
Technical Committee Member — Jan 2024 – Nov 2024

- Facilitated ticket purchase and event administration through a web app built with Next.js, MySQL, and Stripe
- Designed and implemented a Resend API integration to automate transactional emails and payment workflows

**Artificial Intelligence Society** — Richardson, TX
AI Project Manager — Jan 2023 – Sep 2023

- Led and mentored six select UT-Dallas students of varying ML experience through a semester-long project, sharing resources, explaining core concepts, facilitating weekly standups and technical code reviews

**UT-Dallas Comet Wind** — Richardson, TX
Finance Analyst | Collegiate Wind Competitor — Aug 2022 – May 2023

- Built financial models using SAS® that identified a 40% cost reduction via ITC tax credit optimization; team secured $18,000+ in NREL funding and advanced to Phase 2 of the 2023 Collegiate Wind Competition
